

# Final notes on GDP/ GNI/ consumption data - first attempt at extensions

Philipp Cremer, Jannis Stagge, Felix Westerhoff

May 25, 2026

## 1 Cross-section risk sharing regression plots

A first look at the data during the replication period

Figure 1: (Selected) GDP, consumption and GNI per capita

### Risk sharing plots

Start with consumption and income risk sharing during replication period (potential code adjustments?) //

Then, extend to only post-2003 and afterwards also pre-1992 (for both)

Figure 2: Replication of cross-section risk sharing plots

(a) Consumption Risk Sharing

(b) Income Risk Sharing

Figure 3: Cross-section risk sharing plots: Replication country sample, 1993-2019

(a) Consumption Risk Sharing

(b) Income Risk Sharing

Figure 4: Cross-section risk sharing plots: All OECD countries, 1993-2019

(a) Consumption Risk Sharing

(b) Income Risk Sharing

Figure 5: Cross-section risk sharing plots: All OECD countries, 1970-2019

## 2 The Eurozone Extension

We might be interested in how risk sharing and Home Bias developed in the Eurozone:

Figure 6: Cross-section consumption risk sharing plots: 1970-2019, using all available countries

Figure 7: Cross-section income risk sharing plots: 1970-2019, using all available countries

## 3 Sanity Check

(a) Eurozone

(b) OECD, w/o Euro w EU

Figure 8: Cross-section consumption risk sharing plots: 1970-2019, OECD countries

(a) Eurozone

(b) OECD, w/o Euro w EU

Figure 9: Cross-section income risk sharing plots: 1970-2019, OECD countries

(a) Using Eurozone as 1 obs.

(b) Individual Eurozone obs.

Figure 10: Cross-section consumption risk sharing plots: 1995-2019

(a) Using Eurozone as 1 obs.

(b) Individual Eurozone obs.

Figure 11: Cross-section income risk sharing plots: 1995-2019

(a) (Extracted) consumption risk sharing, 2005 constant prices, no government exp.

(b) OECD, w/o Euro w EU

Figure 12: Manually computed PPP adjustment from extracted data

## 4 Channels of Risk Sharing

Relying on ASY (1996), SY (1997) and Gervais/Hosseini (2026), we estimate Channels of Risk Sharing in the Euro Area.

First, note that I am using the Gervais/Hosseini (2026) methodology and data to be able to check whether our code is functioning properly. Table 7 entirely reproducible. I conclude data and code to be correct.

Reproducing the Panel Data Regressions from Table 7 for the Euro Area, we get:

Figure 13: Consumption Risk Sharing using ASY methodology for the Euro Area in selected sample periods

Figure 14: Channels of Risk Sharing in the Euro Area, cross-section estimates
